Šućo Ramović

Full Stack Developer · Electrical Engineer

Motivated web developer with a strong academic background in Electrical Engineering. I build and maintain production e-commerce platforms and business systems — from customer-facing storefronts to a large multi-module ERP — working across the full stack with JavaScript/TypeScript, React, Next.js, Vue.js and Node.js on the front end and PHP/Laravel on the back end.

Git · C

WORK EXPERIENCE

JUN 2025 — PRESENT

Web Developer · Data Design

Full-time web developer building and maintaining a large number of e-commerce stores and business web applications. Selected projects:

- **TiramisuERP** — Actively develop and maintain a large multi-module ERP system (React, TypeScript, TanStack Router & Query, Zustand, AG-Grid Enterprise, React Hook Form & Zod) covering sales, finance, warehouse, e-commerce, gastro/POS, personnel and mobile-sales modules, with internationalization, Sentry error monitoring and real-time updates.
- **Tehnoplus** — Online store for one of Montenegro's largest consumer electronics retailers (Next.js App Router, TypeScript, TanStack Query) over a Laravel REST API: catalog, sale campaigns, product comparison, wishlist, checkout with online payment, user accounts and a separate B2B wholesale mode with customer-specific pricing and Excel catalog export. Cache Components with a custom disk cache handler, Sentry monitoring and a Vitest suite over checkout and pricing logic.
- **Lubenica** — Online furniture and home store for a retailer with six shops in Montenegro (Next.js, TypeScript, TanStack Query, React Hook Form & Zod): catalog, advanced search, sale campaigns, cart and checkout with online payment, wishlist and user accounts.
- **Cvjećara Habitat** — Bilingual (ME/EN) flower and gift shop in Next.js with a CMS-driven page builder, multi-step checkout with delivery scheduling, wishlist and newsletter integration, covered by a Vitest suite.
- **Ksport** — Headless Next.js storefront for a sportswear retailer (React, TypeScript, TailwindCSS, TanStack Query) with product catalog, cart & checkout, online payment, wishlist, user accounts and store locator.
- **BusTicket** — Online bus-ticket booking platform in Next.js with 15-language localization (next-intl), route search, online & offline payment, ticket history, bus rental and an integrated AI chatbot.

EDUCATION

BSc in Electrical Engineering
University of Montenegro,
Faculty of Electrical Engineering
2015 — 2020

High School Diploma (natural sciences)
Gymnasium "Slobodan Škerović", Podgorica
2011 — 2015

- **LevelUp & TimePlus** — E-commerce storefronts on a custom PHP platform (catalog, cart, wishlist, multi-language, blog, shipping and email/payment integrations), including full UI redesigns.

In total I maintain more than 50 projects in production. I work on the shared Laravel REST API powering the stores — new endpoints, bug fixes and performance improvements. Daily stack: React.js, Next.js, TypeScript, Node.js, PHP/Laravel, TailwindCSS and SASS.

NOV 2023 — JUN 2025

Web Developer · Freelance

Designed and built responsive websites and web applications for government and private organizations. Delivered projects using HTML, CSS, JavaScript, React.js, Vue.js, Next.js, Node.js, SASS and TailwindCSS — from UI implementation to deployment.

- **Kata Agency** — Bilingual site for an architecture and design studio, built solo end to end (Next.js, Prisma, PostgreSQL, next-intl), with a custom admin panel: JWT auth, TipTap rich-text editor and full CRUD over projects, services and news.

AUG 2022 — JUL 2026

Software Engineer · Radio i Televizija Crne Gore (RTCG)

Broadcast engineer at the national television station: maintained complex production and broadcasting systems including Avid MediaCentral, iNEWS, MediaComposer, Maestro, iNEWS Command and Airspeed, plus SiMedia's Yes broadcasting/recording system, supporting production, technical and news departments. Also developed internal web applications for the organization, building strong skills in React, Node.js and Vue.js. Full-time until June 2026, then part-time until July 2026.

SEP 2021 — JAN 2022

Electrical Engineer · Ramel

Designed high-voltage installations for buildings, households and hangars at a company specializing in electrical installations. Interpreted the project for the first section of the Montenegro highway — AutoCAD sketches, extracting project information and providing suggestions.
